

Nexion - Customizing

After successful installation of your Nexion - cPanel skin, the next part would be customizing it, so that you can have your company name displayed for your users, and may be your company logo instated of the 'cPanel' image in the top bar.

Well, this document explains you how to do just that!

You have to edit the file 'conf.inc' in your Nexion installation path.

Ex : '/usr/local/cpanel/base/frontend/Nexion_Default/conf.inc'

You can edit this file directly by logging into the server as root or else you can also download this file to your computer and edit the file using your favourite text editor like Notepad or EditPlus, and later upload the file to the path mentioned on the server.

Branding

Branding Your Company Name

In the very first line, you can define your company name by changing the value of the variavle HOSTING_COMPANY, delete cPanelPlus.net and enter your company name there.

Branding Your Company Logo

The second line defines URL of the logo, you can point this variable to the URL of a logo that is there in your website.

Ex: <http://yourcompany.com/logo.gif>

Note : Because the image is displayed in the top bar, make sure that the height of the above image is not more than 29 pixels and width not more than 150 pixels

Configuration

Webmail

If you are using any other eMail interface other than NeoMail, Please change the EMAIL_INTERFACE_URL variable to your webbased email interface URL, Ex: <http://mail.yourcompany.com/>

PHP-MyAdmin

Please set the URL of PHP-Myadmin to the proper URL of your PHP-MYADMIN Interface.

Colors of the skin

You can change the colors of your skin by changing the variables TOPBAR_COLOR, LEFTBAR_BGCOLOR, TABLE_HEADINGS_BGCOLOR
